***Ex Parte Quayle***

1. This application is in condition for allowance except for the following formal matters:

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because the use of legal phraseology "said" in "said signalling message", "said transmitting telecommunication device", and "said receiving telecommunication device".

Correction is required. See MPEP § 608.01(b).

Claims 1 and 5 objected to because correction of the following is required: the limitation "the intended receiving part" in claim 1, line 10, and claim 5 line 15 should be changed to become "an intended receiving part".

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 2665

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 5, the prior art fails to disclose a method and telecommunication device for complementing a telephone connection with additional information, comprising the step of indicating, within a signalling message, an intended receiving part within the receiving telecommunication device of at least part of the signalling message.
